§ 105.15

operation begins. The pilot in command must establish radio communications to receive information regarding air traffic activity in the vicinity of the parachute operation.

- (2) The pilot in command of an aircraft used for any parachute operation in or into controlled airspace must, during each flight—
- (i) Continuously monitor the appropriate frequency of the aircraft's radio communications system from the time radio communications are first established between the aircraft and air traffic control, until the pilot advises air traffic control that the parachute operation has ended for that flight.
- (ii) Advise air traffic control when the last parachutist or object leaves the aircraft.
- (b) Parachute operations must be aborted if, prior to receipt of a required air traffic control authorization, or during any parachute operation in or into controlled airspace, the required radio communications system is or becomes inoperative.

\$105.15 Information required and notice of cancellation or postponement of a parachute operation.

- (a) Each person requesting an authorization under §§ 105.21(b) and 105.25(a)(2) of this part and each person submitting a notification under § 105.25(a)(3) of this part must provide the following information (on an individual or group basis):
- (1) The date and time the parachute operation will begin.
- (2) The radius of the drop zone around the target expressed in nautical miles.
- (3) The location of the center of the drop zone in relation to— $\,$
- (i) The nearest VOR facility in terms of the VOR radial on which it is located and its distance in nautical miles from the VOR facility when that facility is 30 nautical miles or less from the drop zone target; or
- (ii) the nearest airport, town, or city depicted on the appropriate Coast and Geodetic Survey World Aeronautical Chart or Sectional Aeronautical Chart, when the nearest VOR facility is more than 30 nautical miles from the drop zone target.

- (4) Each altitude above mean sea level at which the aircraft will be operated when parachutists or objects exist the aircraft.
- (5) The duration of the intended parachute operation.
- (6) The name, address, and telephone number of the person who requests the authorization or gives notice of the parachute operation.
- (7) The registration number of the aircraft to be used.
- (8) The name of the air traffic control facility with jurisdiction of the air-space at the first intended exit altitude to be used for the parachute operation.
- (b) Each holder of a certificate of authorization issued under §§ 105.21(b) and 105.25(b) of this part must present that certificate for inspection upon the request of the Administrator or any Federal, State, or local official.
- (c) Each person requesting an authorization under §§ 105.21(b) and 105.25(a)(2) of this part and each person submitting a notice under §105.25(a)(3) of this part must promptly notify the air traffic control facility having jurisdiction over the affected airspace if the proposed or scheduled parachute operation is canceled or postponed.

§ 105.17 Flight visibility and clearance from cloud requirements.

No person may conduct a parachute operation, and no pilot in command of an aircraft may allow a parachute operation to be conducted from that aircraft—

- (a) Into or through a cloud, or
- (b) When the flight visibility or the distance from any cloud is less than that prescribed in the following table:

Altitude	Flight vis- ibility (statute miles)	Distance from clouds
1,200 feet or less above the surface re- gardless of the MSL altitude.	3	500 feet below, 1,000 feet above, 2,000 feet horizontal.
More than 1,200 feet above the surface but less than 10,000 feet MSL.	3	500 feet below, 1,000 feet above, 2,000 feet horizontal.
More than 1,200 feet above the surface and at or above 10,000 feet MSL.	5	1,000 feet below, 1,000 feet above, 1 mile horizontal.
